29 октября 2013 г. состоится семинар "Ресурсы издательства Elsevier".

Семинар из двух частей, первая - ресурсы издательства Elsevier, вторая - онлайн тренинг по работе с полнотекстовой платформой Science Direct и индексом цитирования Scopus для научных работников.

Мы будем рады видеть Вас на «ProQuest Day»!

Впервые 2 октября 2013г. в Самаре по инициативе Самарского государственного аэрокосмического университета совместно с американской компанией ProQuest, ведущим мировым поставщиком электронной научной информации, и подписным агентством «КОНЭК» поводится международный семинар «ProQuest Day».

Доступ к Web of Science будет открыт с 1 октября.

Уважаемые преподаватели! Одной из форм обучения по ра **Web of Science** являются интерактивные семинары, которые регулярно проводятся в два цикла: базовый и расширенный, каждый из которых включает в себя четыре семинара. Видеозаписи проведенных семинаров вы можете найти на веб-сайте <http://wokinfo.com/russian>.

At a glance

As the world's leading provider of science and health information, Elsevier serves more than 30 million scientists, students and health and information professionals worldwide. We partner with a global community of 7,000 journal editors, 70,000 editorial board members, 300,000 reviewers and 800,000 authors to help customers advance science and health by providing world-class information and innovative tools that help them make critical decisions, enhance productivity and improve outcomes.

Headquartered in Amsterdam, we are a global company employing more than 7,000 people in 24 countries. We are a founding publisher of global programs that provide free or low-cost access to science and health information in the developing world. Elsevier's roots are in journal and book publishing, where we have fostered the peer-review process for more than 130 years. Today we are driving innovation by delivering authoritative content with cutting-edge technology, allowing our customers to find the answers they need.

Below is an overview of our flagship products:

SciVerse Scopus (www.scopus.com) представляет собой крупнейшую в мире единую реферативную базу данных, которая индексирует более 18000 наименований научно-технических и медицинских журналов примерно 5,000 международных издательств. Ежедневно обновляемая база данных Scopus включает записи вплоть до первого тома, первого выпуска журналов ведущих научных издательств. Она обеспечивает непревзойденную поддержку в поиске научных публикаций и предлагает ссылки на все вышедшие рефераты из обширного объема доступных статей.

Разработчикам, отвечающим за информационное наполнение, пришлось оценить огромное количество источников, чтобы гарантировать отражение научной литературы самого высокого качества, включая публикации в открытом доступе (Open Access), труды научных конференций, а также материалы, доступные только в электронной форме. Поисковая система Scopus также предлагает Research Performance Measurement (RPM) — средства контроля эффективности исследований, которые помогают оценивать авторов, направления в исследованиях и журналы.

В качестве рекомендации по работе с БД **Scopus** воспользуйтесь **"Руководством пользователя"**

Доступ к БД Scopus осуществляется со всех компьютеров, входящих в корпоративную сеть СГАУ по IP адресам.

Язык документов - английский.

Коллекции издательства Elsevier

All articles published in Elsevier open access journals are peer reviewed and upon acceptance will be immediately and permanently free for everyone to read and download. Permitted reuse is defined by your choice of [user license](#).

Authors publishing in these journals will use an exclusive licensing agreement, where they will retain copyright alongside scholarly usage rights and Elsevier will be granted publishing and distribution rights.

As there are no subscription charges for open access journals, a fee is payable by the author or research funder to cover the costs associated with publication. Our open access publication fees range from \$500-\$5000USD. Visit the individual journal homepages for specific pricing information.

Elsevier has established agreements with [funding bodies](#), including Wellcome Trust and Research Councils UK. This ensures authors can comply with funding body open access policies and may also be reimbursed for their publication fees.

In addition to open access journals, Elsevier also provides [open access options](#) in over 1600 established peer-reviewed journals.

Open access to archived research

Elsevier enables subscribers and the general public to have open access to archived material in 96 Elsevier journals. This includes all Cell Press articles after 12 months via the Cell Press website.

Articles are made open access after an embargo period which begins from the final publication date of the article. The embargo periods are determined by the characteristics of the journal including subject area, usage patterns and frequency of publication.

Articles featured in the archives are permanently free for everyone to read and download with permitted re-use.

Elsevier provides authors with open access options

Elsevier now offers an open access option in over 1600 established peer-reviewed journals. This helps authors to publish in respected high quality journals while also complying with new open access policies and mandates.

All articles published open access are peer-reviewed and upon acceptance will be immediately and permanently free for everyone to read and download. Permitted reuse is defined by the author's choice of [open access user license](#).

Further information about this program is detailed below:

What is it?	Publishing open access	Publication fee	Permitted reuse
Authors have two choices when choosing to publish their research in established Elsevier journals :			
Open Access	Subscription		
Articles are freely available to both subscribers and the wider public with permitted reuse .	Articles are made available to subscribers as well as developing countries and patient groups through our access programs .		
An Open Access publication fee is payable by authors or their research funder.	No Open Access publication fee		

The publication choice will have no effect on the peer review process or acceptance of the submitted article.

- Важно, чтобы автор и его читатели говорили на одном языке (в прямом и переносном смысле)
- Важно – следовать инструкциям и руководствам для авторов при подготовке публикации

Make your
research count.
Publish ethically

As researchers, you can make valuable and lasting contributions to the health and future of society.

Understanding the ethical boundaries in scientific research and publishing is a key step in making sure your work gets off to the best start. From there, anything's possible.

<http://www.ethics.elsevier.com/>

website have been developed to provide resources and tools so you can proceed confidently.

Scientific truth is the foundation of scientific advancement. Present your work with the intellectual integrity that the scientific community expects.

 **So you think you're ethical?**
Take our quick quiz to find out!

 **What are the Top 5 reasons to publish ethically?**

Cognitive Psychology

Volume 66, Issue 4, June 2013, Pages 355–379

Cross-format physical similarity effects and their implications for the numerical cognition architecture

Dale J. Cohen, Erin Warren, Daryn Blanc-Goldhammer

Department of Psychology, University of North Carolina Wilmington, 601 South College Road, Wilmington, NC 28403-5612, United States

Highlights

- We assess RT in numerical cross-format comparison tasks.
- Physical similarity predicts RT for numerical cross-format same/different tasks.
- Physical similarity and distance effects predict RT for magnitude comparison tasks.
- The data support direct links between format modules.
- The data support format specific quantity representations.

Abstract

The sound [faɪv] is visually depicted as a written number word "five" and as an Arabic digit "5." Here, we present four experiments – two quantity same/different experiments and two magnitude comparison experiments – that assess whether auditory number words ([faɪv]), written number words ("five"), and Arabic digits ("5") directly activate one another and/or their associated quantity. The quantity same/different experiments reveal that the auditory number words, written number words, and Arabic digits directly activate one another without activating their associated quantity. That is, there are cross-format physical similarity

Explore Elsevier

- ElsevierConnect
- Elsevier Open Access
- Elsevier Content Innovation
- Mendeley
- Scopus
- Reaxys

- Владелец/ Создатель: издательство Elsevier
- Индексирует 21 000 журналов (включая 2 600 журналов открытого доступа) из 5 000 издательств (50 миллионов записей, 78 % с рефератами), 5,5 млн. записей по материалам конференций

Индексы научного цитирования. Основные положения

- Индексы цитирования это базы данных/ресурсы, содержащие информацию о публикациях и их цитировании (Scopus, Российский индекс научного цитирования)
- У автора не может быть индекса цитирования, а может быть показатель цитируемости
- Расчет показателей цитируемости в каждом конкретном ресурсе осуществляется на основе информации (источников), содержащейся именно в данном ресурсе, поэтому показатели цитируемости одного и того же автора в разных ресурсах могут различаться
- Индекс Хирша (H-index) рассчитывается для любого подмножества статей (отдельного автора, отдельного журнала, отдельной организации, отдельной страны, набора статей)
- На сегодня у автора нет возможности добавить отдельную статью в Scopus

Updated daily, Scopus includes:

- 21,000 titles from more than 5,000 international publishers
 - 20,000 peer-reviewed journals (including 2,600 open access journals)
 - 390 trade publications
 - 370 book series
- 5.5 million conference papers
- "Article in press" from more than 3,850 journals and publishers
- Bibliographies from Elsevier Publishing Group and the IEEE (Institute of Electrical and Electronics Engineers)

TITLE SUGGESTION

[Help](#)

Please read carefully before completing this form

- Please check the [Scopus title list](#) to determine whether the title you wish to suggest is already in Scopus. Please be aware that active Medline-sourced titles (see column M in the title list) may also be suggested for full Scopus coverage.
- New titles are reviewed on a continuous basis by the independent Scopus [Content Selection & Advisory Board](#) (CSAB).
- We strive to evaluate new title suggestions as quickly as possible, however, please allow for several months up to one year for the review process to be completed.
- The CSAB uses sample documents of published content to evaluate the quality of a title. We recommend that a title has published for at least two years before it is suggested for inclusion in Scopus and we may reject a title suggestion for review if the publication history is too short to review the title.
- You will be asked to provide sample PDFs as a final step in the title suggestion process. **It is not possible to complete the title suggestion process without uploading PDFs.**
- Be aware that the evaluation of a title is not influenced by the number of times it is suggested. Multiple submissions of the same title will only delay the review process.
- Review of your title suggestion does not guarantee selection of the title.
- Titles lacking a dedicated website with information relevant for review will not be considered for evaluation.

If you have any questions about the evaluation process, you can contact us at titlesuggestion@scopus.com.

Transparent selection criteria

Scopus includes titles from more than 5,000 publishers worldwide. When your titles are indexed in Scopus, your journals are visible to

<http://www.elsevier.com/online-tools/scopus/content-overview#content-policy-and-selection>

continuous basis. The CSAB reviews titles using both quantitative and qualitative measures; the selection is partly based on sample documents from the title. Before suggesting a title, please read the CSAB's statement: [A General Introduction to Scopus and the Work of the Content Selection and Advisory Board](#). Both the suggestor and/or Publisher will be informed about the outcome of the review including supporting reasons for the decision.

Подготовка российских журналов для зарубежной аналитической базы данных Scopus

РЕКОМЕНДАЦИИ И КОММЕНТАРИИ

О.В. Кириллова, к.т.н.

заведующая отделением ВИНИТИ РАН

член Экспертного совета (CSAB) БД SCOPUS

Предлагая русскоязычные журналы в БД SCOPUS, необходимо хорошо представлять, какую роль информация из журнала должна выполнять в этой БД. Роль журнала велика. Вся аналитика строится на данных из журнала. Журнал выполняет широкий спектр функций, которые в целом дают представление:

- о направлениях развития российской науки и ее достижениях, ее конкурентоспособности и степени интеграции в мировое научное сообщество;
- о публикационной активности российских авторов;
- о публикационной активности и рейтинге российских организаций по публикациям их авторов;
- об оценке степени признания и уровня российских публикаций в мировом сообществе по данным их цитирования;
- о качестве российских журналов в сравнении с мировым потоком изданий в соответствующей предметной области и т.д.

Корректными и полными эти данные могут считаться только при качественном представлении:

- названия журнала;
- заглавий статей на английском языке;
- аннотаций на английском языке к каждой научной статье;
- фамилий авторов;
- адресных сведений о месте работы авторов, в первую очередь, названий организаций (данные об аффилировании авторов (author affiliation));
- приставных списков литературы в романском алфавите (латинице) в таком качестве, чтобы эти ссылки могли быть учтены при изучении цитирования публикаций авторов и журналов.

Таким образом, буквально все элементы данных, содержащихся в журнале (составляющие журнал), играют роль информационных индикаторов для оценки российской науки, российских ученых, организаций и самих

Scopus

Крупнейшая в мире база данных рефератов и цитирования

Scopus (www.scopus.com) представляет собой крупнейшую в мире единую реферативную базу данных, которая индексирует более 18000 наименований научно-технических и медицинских журналов примерно 5,000 международных издательств. Ежедневно обновляемая база данных Scopus включает записи вплоть до первого тома, первого выпуска журналов ведущих научных издательств. Она обеспечивает непревзойденную поддержку в поиске научных публикаций и предлагает ссылки на все вышедшие рефераты из обширного объема доступных статей.

Разработчикам, отвечающим за информационное наполнение, пришлось оценить огромное количество источников, чтобы гарантировать отражение научной литературы самого высокого качества, включая публикации в открытом доступе (Open Access), труды научных конференций, а также материалы, доступные только по подписке (RPM).

Research guided by experience

Welcome to Elsevier's Early Career Resources site. The **Career and funding** section offers advice on how to plan a successful research career, partly best achieved by also keeping **Ethics in research and publishing** in mind. **Search and discovery** tools can help you identify relevant scientific information and combined with **Writing and publishing** resources, improve your chances of getting published. Our **Networking** pages show why it's important to maintain a network and we give advice on how to start. Download free guides from **Guides and recommended Reading** and visit our **Training and workshops** area to listen to webcasts and to get useful 'crib sheets' to point the way on your career journey.

Ethics in Research and Publishing

Upholding ethical integrity is important for your research career

What are the major types of scientific misconduct? Why publish ethically? It ensures scientific progress, it protects life and the planet, it promotes ethical behavior. It's the only way.
